A bandsaw is a power saw with a long, sharp blade consisting of a continuous band of toothed metal stretched between two or more wheels to cut material. They are used principally in woodworking, metalworking, and lumbering, but may cut a variety of materials. Advantages include uniform cutting action as a result of an evenly distributed tooth load, and the ability to cut irregular or curved shapes like a jigsaw. The minimum radius of a curve is determined by the width of the band and its kerf. M

Between the years 1955 and 1970, there were other steel pan players who joined the band and made us better: Kelvin Dove, originally from, and one of the founders of Invaders Steel Band; Herman [“Rock”] Johnston, tuner, arranger, leader of West Symphony from St James, Trinidad, and Steve Dupres, who rejoined the band after a few years with [Curtis] Pierre’s Dixieland Steel Band and after winning the Music Festival with the Dixieland Steel Band.

The author presents a resource for directors of steel bands, beginning with the history of pan, starting a program, and components of an ensemble, and followed by techniques, developing instrumentation, repertoire, and rehearsal strategies. Listening resources are included.

The first book of its kind, this discography covers the history of steel band and pan music on recordings. In more than 775 entries, it comprises all known recordings on phonograph records, cassettes, and compact disks in which one or more steel pans is featured or used in an accompanying role. For each entry, information is provided on the location of the recording session, release date, record company catalog number, and complete contents. Indexes facilitate access to artists, arrangers/conductors/musical directors, record titles, years of release, and compositions; and appendices provide information on record companies, calypsonians, and sources. A reference bibliography completes the work. While serving as a guide for locating these recordings, this discography also will function as a research tool for investigation into other aspects of the steel pan movement, a history largely undocumented except in audio recordings.

Steel Drums and Steelbands: A History is a vivid account of the events that led to the “accidental” invention of the steel drum: the only acoustic musical instrument invented in the 20th century. Angela Smith walks readers through the evolution of the steel drum from an object of scorn and tool of violence to one of the most studied, performed, and appreciated musical instruments today. Smith explores the development of the modern steelband, from its roots in African slavery in early Trinidad to the vast array of experiments in technological innovation and to the current explosion of steelbands in American schools. The book offers insights directly from major contributors of the steelband movement with sections devoted exclusively to pioneers and innovators. Drawing on seven years of research, repeated trips to the birthplace of the steel drum, Trinidad, and interviews with steelband pioneers, Smith takes readers far beyond the sunny associations of the steel drum with island vacations, cruise ships, and multiple encores of “Yellow Bird.” Digging deep into Trinidad’s history—a tale of indigenous extermination and African slavery, of French settlement and Spanish and British colonialism before mid-century independence—Smith weaves an unforgettable narrative of talking drums, kalinda stick fights, tamboo bamboo bands, iron bands, calypso, Carnival, and the U. S. military. Together, all played major roles in the evolution of today’s steelband and in the panman’s journey from renegade to hero in the steelband’s move from the panyards of Trinidad’s poorest neighborhoods to the world’s most prestigious concert halls. The reader will discover how an instrument created by teenage boys, descendants of African slaves, became a world musical phenomena. Steel Drums and Steelbands is the ideal introduction to the steel drum, steelbands, and their history.

"Maybe you won't like steel band. It's possible. But it's been said that the Pied Piper had a steel band helping him on his famous visit to Hamelin." When the US Navy distributed this press release, anxieties and tensions of the impending Cold War felt palpable. As President Eisenhower cast his gaze towards Russia, the American people cast their ears to the Atlantic South, infatuated with the international currents of Caribbean music. Today, steelbands have become a global phenomenon; yet, in 1957 the exotic sound and the unique image of the US Navy Steel Band was one-of-a-kind. Could calypso doom rock "n" roll? Band founder Admiral Daniel V. Gallery thought so and envisioned his steelband knocking "rock "n" roll and Elvis Presley into the ash can." From 1957 until their disbandment in 1999, the US Navy Steel Band performed over 20,000 concerts worldwide. In 1973, the band officially moved headquarters from Puerto Rico to New Orleans and found the city and annual Mardi Gras tradition an apt musical and cultural fit. The band brought a significant piece of Caribbean artistic capital--calypso and steelband music--to the American mainstream. Its impact on the growth and development of steelpan music in America is enormous. Steelpan Ambassadors uncovers the lost history of the US Navy Steel Band and provides an in-depth study of its role in the development of the US military's public relations, its promotion of goodwill, its recruitment efforts after the Korean and Vietnam Wars, its musical and technological innovations, and its percussive propulsion of the American fascination with Latin and Caribbean music over the past century.

The steel pan is the only musical instrument to have been invented in the 20th century. The story begins in Trinidad, in the Caribbean, where the people first begin to use all kinds of metal objects to make music. They collected a wide variety of assorted tins and shaped them and tuned them until they were turned into musical instruments. From Trinidad, the mighty steel orchestra has spread across the world. Includes a CD of Sterling's Angels (children's steel band led by Pan Maestro Sterling Betancourt) playing a range of music.

Haskett examines the spread of steel band in US schools and universities. This phenomenon is examined within the context of the music education field.
