Hearing Allah ' s Call changes the way we think about Islamic communication. In the city of Bandung in Indonesia, sermons are not reserved for mosques and sites for Friday prayers. Muslim speakers are in demand for all kinds of events, from rites of passage to motivational speeches for companies and other organizations. Julian Millie spent fourteen months sitting among listeners at such events, and he provides detailed contextual description of the everyday realities of Muslim listening as well as preaching. In describing the venues, the audience, and preachers—many of whom are women—he reveals tensions between entertainment and traditional expressions of faith and moral rectitude. The sermonizers use in-jokes, double entendres, and mimicry in their expositions, playing on their audiences' emotions, triggering reactions from critics who accuse them of neglecting listeners' intellects. Millie focused specifically on the listening routines that enliven everyday life for Muslims in all social spaces—imagine the hardworking preachers who make Sunday worship enjoyable for rural as well as urban Americans—and who captivate audiences with skills that attract criticism from more formal interpreters of Islam. The ethnography is rich and full of insightful observations and details. Hearing Allah ' s Call will appeal to students of the practice of anthropology as well as all those intrigued by contemporary Islam.

Hope Revealed sets the record straight. Revelation is not as bizarre and vindictive as many have imagined. Its message is hopeful, not pessimistic, world-affirming, not world-denying, and thoroughly congruent with the biblical emphasis on love, reconciliation, and forgiveness. Revelation invites us to drink deeply from its metaphors of promise and warning, vision and blessing. While Revelation's method and theological conceptuality are relatively different from the rest of the New Testament, once they are appreciated in their own right, they contribute to make this book not only one of the finest literary works in the Christian canon, but also one of the greatest theological achievements of early Christianity.

Worth offers an adapted study guide to accompany Transitions Throughout the Life Span, a new telecourse produced by Coast Learning Systems. Kathleen Stassen Berger was closely involved in the development of the telecourse, and The Developing Person Through the Life Span is the sole text accompanying the telecourse. The telecourse study guide draws clear connections between the text and telecourse.

One of the world's most respected religion journalists profiles New York's Archbishop Timothy Dolan, one of the country's—and possibly the world's—most important Catholic leaders through lengthy exclusive interviews. Unique among the current leadership of the Catholic Church, Archbishop Dolan shares his insightful perspective in this series of conversations on the present and future of Catholicism. In these pages Dolan shares a perspective which is typically not part of the information an average person would know through today's media. This omission often leaves outsiders with a terribly flawed grasp of what's actually happening in the Church. Legitimate stories on, for example, abuse and Church authority can't be dissolved by reactive conspiracy theories about how the media is out to get the Catholic Church. That said, if these scandals are all there is to the Catholic Church, why would anyone bother being Catholic? It may not be surprising that there are an estimated 22 million ex-Catholics out there, yet it is revealing that even more people have chosen to remain with the Church. Tens of millions of Americans, and hundreds of millions more around the world, still turn to the Church for inspiration, for its sacramental life, for its experience of community and service. In every diocese in America you can find parishes that are flourishing. The faith represented there is not an exaggerated religious frenzy that feeds an uncritical view of the Church. Catholics are nothing if not sober realists about the humanity of their institutions and leaders. They see the Church not as a debating society or a multinational enterprise, but a family—with all the flaws and dysfunction, but also all the joy and life, of families everywhere. This is why Archbishop Dolan is such an important part of the Church's emerging landscape. In A People of Hope Dolan is seen at his best, capturing an upbeat, hopeful, affirming Catholicism that's the untold story about the Church today. As readers spend time with Dolan here, they may find that his love for people and zest for friendship is what's truly fundamental about the man, not a PR device calculated to conceal some other agenda. Dolan can and does draw lines in the sand when he believes that core matters of Catholic identity are at stake. He's well aware that we live in a deeply secular world in the West, in which powerful pressures, both subtle and overt, seek to blur the counter-cultural message of Catholicism on many fronts. One key to Dolan's character, however, is that changing hearts, not knocking heads, is always his first instinct. John Allen draws out a picture of future trends by exploring where Dolan wants to lead, and how will a Church that increasingly bears his imprint look and feel? To understand this, what's really necessary is to get inside his head and then let him speak for himself. To that end Allen frames questions in a way that allows Dolan to expand on the topic himself as much as possible. The result is a book more "with" Dolan than a book "about" him, which is indeed the best way to understand the man. At the end, one can agree or disagree with Dolan's outlook, but one may at least be better equipped to understand why thoughtful modern women and men might still believe there's something worth considering in the Catholic message. Whatever the future may have in store for Dolan—staying in New York until he dies, being called to Rome to work in a senior Vatican post, or something else entirely—he will be a force in the Catholic Church both nationally and internationally for some time to come, and it's well worth trying to discern what that might mean. From the Hardcover edition.

In the late 1980s, a promising new treatment for breast cancer emerged: high-dose chemotherapy with autologous bone marrow transplantation or HDC/ABMT. By the 1990s, it had burst upon the oncology scene and disseminated rapidly before having been carefully evaluated. By the time published studies showed that the procedure was ineffective, more than 30,000 women had received the treatment, shortening their lives and adding to their suffering. This book tells of the rise and demise of HDC/ABMT for metastatic and early stage breast cancer, and fully explores the story's implications, which go well beyond the immediate procedure, and beyond breast cancer, to how we in the United States evaluate other medical procedures, especially life-saving ones. It details how the factors that drove clinical use—patient demand, physician enthusiasm, media reporting, litigation, economic exploitation, and legislative and administrative mandates—converged to propel the procedure forward despite a lack of proven clinical effectiveness. It also analyzes the limited effect of technology assessments before randomized clinical trials evaluated decisively the procedure and the ramifications of this system on healthcare today. Sections of the book consider the initial conditions surrounding the emergence of the new breast cancer treatment, the drivers of clinical use, and the struggle for evidence-based medicine. A concluding section considers the significance of the story for our healthcare system.
