Vision 2030 outlines emerging challenges, analyzes the current positioning, and highlights imperatives for the European chemical industry in positioning itself to stay ahead in the game. The European chemical industry is facing major challenges as value chains increasingly move eastward, drawn by economic growth and market opportunities in Asia. A new, more competitive environment is taking shape, giving rise to state-controlled players and emerging chemical giants.

### Chemical industry vision 2030: a European perspective ...

Chemicals manufacturing 2030+ We see five global trends that will shift the industry. 1. Growth rates will likely continue to diverge among China, US, and Europe; China will build new at-scale assets, while Europe and US will continue to use existing assets.

### Chemicals manufacturing 2030+: More of the same...but different

1. Harness the new sources of industry profitability. For the period 2020 to 2030, we anticipate fewer truly advantaged investments and a step change in industry conduct. Since the early 2000s, over half of petrochemical investments have been based on advantaged feedstock, in particular in the C 1 and C 2 chains.

### Petrochemicals 2030: Reinventing the way to win in a ...

Department of Chemistry - Vision 2030: Vision. A department with excellence in academics and research in Chemistry, capable of producing highly competent graduates for addressing the needs of higher education, agriculture, health and chemical industry.

### Vision 2030 - University of Agriculture Faisalabad

Cefic 's mid-century report ' Molecule Managers ' sets out a plausible path towards a prosperous, more sustainable Europe in 2050. This report outlines a vision of the chemical industry at mid-century and offers an invitation to discuss and debate the urgent decisions we are all facing – the prerequisites to a world that is cleaner, healthier and more inclusive, where the costly transition to climate neutrality has been socially fair, and in which Europe maintains its global relevance.

### Mid-Century Vision - cefic.org

The global market for chemicals is a dynamic growth market to 2030, with chances for the German chemical-pharmaceutical industry to continue the successes of the past – if the framework conditions in the energy policy in Germany and Europe do not further weaken the competitiveness of the industry. Competition is becoming more intense.

### The German Chemical Industry 2030 - Update 2015/2016 ...

Vision 2030. In a global competitive environment that is changing drastically, the trilateral chemical industry faces fundamental economic, environmental and technological challenges. To prepare for the future, capture the benefits of a growing chemical industry and remove existing bottlenecks for this development, an important strategic process had been launched in 2017.

### Trilateral Chemical Region

As a result, the industry, which generated \$9,540.0 million in 2019, is projected to grow at a 6.6% CAGR during 2020 – 2030 (forecast period), to reach \$18,474.2 million by 2030. Rather than actual chemicals, green chemicals are made from organic resources and, thus, are biodegradable and not harmful to the environment.

### Green Chemicals Market Research Report: By Product ...

Persistence Market Research has published a market research report on the high purity alumina market that contains global industry analysis of 2015 – 2019 and forecasts for 2020 – 2030. The report provides insightful analysis of the high purity alumina market through different segments - product, application, and region.

### High Purity Alumina Market Estimated to Expand at a CAGR ...

In line with Vision 2030, we have the ambition to further double its value. Saudi Arabia has already embarked on a transformational program that will generate a significant industrial growth in various sectors, which will be the main driver for the development of the chemicals sector in all segments – basics, intermediates, and specialties.
