The EMD 645 is a family of diesel engines that was designed and manufactured by the Electro-Motive Division of General Motors. While the 645 series was intended primarily for locomotive, marine and stationary engine use, one 16-cylinder version powered the 33-19 "Titan" prototype haul truck designed by GM's Terex division.

EMD 645 - Wikipedia

EMD "645" Engine The Electro-Motive Division's model 645 prime mover further advanced the builder's dominance in the locomotive marketplace. The diesel engine was born from a need to offer increased horsepower since the reliable model 567, which had been in production since 1938 and finally reached the limit of its capabilities.

EMD 645 engine maintenance
The 645 series was an evolution of the earlier 567 series and a precursor to the later 710 series. First introduced in 1965, the EMD 645 series remained in production on a by-request basis long after it was replaced by the 710, and most 645 service parts are still in production.
