Robin Horsfall shot and killed one of the leading terrorists inside the Iranian Embassy when the SAS stormed the building. He served with the SAS during the Falklands War and on subsequent counter-terrorist operations. He tells his personal odyssey from boy-soldier to paratrooper with insight and wisdom. His enemies were not just terrorists: he fought the institutionalized brutality of the Parachute Regiment -- and his own inner demons. He learned the difference between physical and moral courage; between officers who expect you to be ready to die for them, and those who actually want you to get killed so they can win a medal. It's an action-packed narrative, but much more than another RAMBO-style romp. Robin reveals some painful truths, not least the ordinary SAS men's view of General de la Billiere and his orders for a kamikaze mission to Argentina. This is the best, no-holds barred, personal account of an SAS trooper ever published.

This book is a meditation on facing fear, heartbreak, and mortality. It is the story of a man who in rapid succession has his wife die in his arms, loses his house and his job, and is left to care for his 19-month old daughter. Oddly enough, the best tools for coping with all of this were those he learned in more than two decades of the martial arts practice. Not Afraid tackles this extremely heavy subject matter in a light-hearted style and with an attitude that acknowledges pain and suffering but denies them dominion over one's life. In his own irreverent and inimitable style, Daniele Bolleli tells the story of his courtship and marriage, which would have been a sweet story had not all hell broken loose. Or as he puts it, "Hell was a ninja who entered my house without being seen. It all began in such an unremarkable way that it barely registered as anything meaningful. Little did I know that the experiences of the next five months would rip me apart and kill me. They would re-forge me into a different man. On that day, I became an unwilling traveler on a journey through the heart of fear. Every step along the way has forced me to face my fears time and time again." In autobiographical fashion, Not Afraid recounts how martial arts practice and personally relating to fear-inducing experiences can affect and shape one's personality. The result is a page-turning book about beauty as well as tragedy, hope as well as despair.

Appealing to humans' basic instincts to increase influence, buy-in and results Survival of the species comes down to three basic instincts, say behavioural research strategists Dan Gregory and Kieran Flanagan—fear, self-interest and simplicity. These basic human behaviours come into play in all types of relationships, including those between businesses and customers. Selfish, Scared and Stupid: Stop fighting human nature and increase your performance, engagement and influence, demystifies these behaviours and examines the psychology behind why even the best ideas sometimes fail. This book helps businesses design their organisations for reality rather than perfection, and also offers strategies to head off unprecedented levels of disengagement within, and outside, the business. It answers baffling questions around why the public sometimes fails to engage despite overwhelming data suggesting otherwise, why so many new products end up on clearance shelves and why so many great salespeople often fall short of their monthly targets. Learn how the survival of the species plays into business, including delusionary realities and the reasons ideas can fail Discover how to offer customers strategic rewards, thereby making the buying process more attractive to selfish natures Examine the link between fear and the unknown, including strategies for quelling fears and turning them into action Learn to use a simple mindset to create low-involvement products, helping appeal to instinct and making products hard to resist This provocative book is built on the idea that businesses must return to a more human engagement methodology in order to succeed. It is an informative read for anyone interested in improving influence, growing business reach, improving sales figures or understanding the complexities of human behaviour.

How often have you seen a development built that no one wanted or needed -- ruining the neighborhood, harming the landscape, and wrecking property values -- despite grumbling and protests by the neighbors, and sometimes without anyone even knowing it was going to happen until it was too late? All across America, bad development is approved because ordinary people don't have the knowledge they need to stand up and fight back. At any time, you can get a public notice telling you a notorious real estate developer has applied for a permit to build nearby. Will you know how to respond? Will you know what steps to take to protect your rights? Fight City Hall and Win gives ordinary folks the insider knowledge they need to protect their neighborhoods. It is filled with humor, irony, and true-to-life bedtime stories that teach readers how to take on the good old boys at city hall -- and win.

As we navigate life's terrains, we are often challenged to rediscover aspects of ourselves that we've kept hidden as a measure of protection. Dr. Knight presents a challenge for the reader to become intimate with oneself in a way that allows one to overcome the impact of hidden trauma. This journey of self-discovery reveals a message of hope in the face of uncertainty and encourages the reader to embrace the gifts that reside within. Readers will gain a deeper understanding of the power of healing and its impact on how we explore the world when we love ourselves courageously.
