Hf Data Modem Codan
Codan's 3212 HF Data Modem ensures you get connected anywhere by providing reliable, cost-effective, high speed mobile data communications in remote areas where little or no telecommunications infrastructure exists.

Codan 3212 - HF Data Modem - AT Communication
The CODAN 3012 HF modem signalling protocol, designed to maximise performance over typical long-range channels, combines with internal data compression to give an effective data transfer speed of up to 6,000 bps. Easy to use. The CODAN 3012 HF modem interface is based on the AT industry standard.

Hf Data Modem CODAN 3012 | High speed HF 558 Data Modem
Codan's range of HF data modems provide reliable, cost-effective, high speed mobile data communications in remote areas where little or no telecommunications infrastructure exists. High performing and compatible with advanced Automatic Link Establishment (ALE), our HF modems for data and email are typically four times faster than comparable competitors' modems.

CODAN HF Data Modem - ACG Systems, Inc. ACG Systems, Inc.
Codan Data Modulation for Codan Data Modems. This modulation is used in Codan's 9001, 9002, 3012 and 3212 modems. Data link comprises of 16 DPSK (Differential Phase-Shift Keying) channels at 112.5 Hz spacing on 1800 Hz of bandwidth. Codan's CHIRP (an ALE signal) uses PSK modulation across 32 channels with 80Hz of spacing.

Codan Data Modem - Signal Identification Wiki
CODAN HF Data Decoder. Description of CODAN-3212 Data Station. ODAN-3212 is an HF transmission mode de- fined and developed by the same named Aus- tralian company. This mode provides a robust method of data communication over the HF path. The mode ODAN-3212 is the successor of ODAN-3012/ODAN-9001. The ODAN-3212 modem has different operation modes.

CODAN HF Data Decoder - WAVECOM
A typical 9002 modem station consists of: • 9002 HF Data Modem • Codan 'data capable' transceiver • Power supply • Computer terminal with 9102 software • Antenna system. The Codan 9102 Fax and data controller software, supplied with your 9002 modem, gives a friendly, easy to operate interface to the 9002 and its features.

User Guide - Repeater Builder
Codan's robust low rate modem, available as a software option in Envoy and Sentry-H 6120-BM products provides data throughput up to 2,400 bps (uncompressed) or 6,000 bps (compressed), and is a highly cost effective option. Codan also provides full MIL-STD modem This provides data according to MIL-STD-188-110A & B, with rates up to 9,600 bps.
