MORI SEIKI - MV 40 A

The early Mori's had 2 types of tool changers, the MV Junior and MV 40 had a small AC motor that drove the ATC (this is the one with the main arm held on the shaft with locking rings and once the screws were loose, you did need to "shock" the main arm loose from the shaft), the MV35, MV45, etc. had a hydraulically driven ATC, NO MOTOR OF ANY KIND. and the main arm is "splined" to the shaft (no adjustment there).

Provides the ideas, guidelines and techniques you need to capture the full potential of your CNC equipment. Nearly every aspect of CNC operations is addressed and the book is organized so you can use it as a step-by-step guide to efficient CNC utilization or as a shop floor reference for continuous improvement. Hundreds of specific utilization-boosting techniques are detailed.
