For intermediate courses in economics. In Macroeconomics, Blanchard presents an integrated, global view of macroeconomics, enabling students to see the connections between goods markets, financial markets, and labor markets worldwide. A unified view of the latest macroeconomic events In Macroeconomics, Blanchard presents an integrated, global view of macroeconomics, enabling students to see the connections between goods markets, financial markets, and labor markets worldwide. Organized into two parts, the text contains a core section that focuses on short-, medium-, and long-run markets and two major extensions that offer more in-depth coverage of the issues at hand. From the major economic crisis that engulfed the world in the late 2000s, to monetary policy in the US, to the problems of the Euro area, and growth in China, the text helps students make sense not only of current macroeconomic events but also of those that may unfold in the future. Integrated, detailed boxes in the 8th Edition have been updated to convey the life of macroeconomics today, reinforce lessons from the models, and help students employ and develop their analytical and evaluative skills.

Leading economists consider the shape of future economic policy: will it resume the pre-crisis consensus, or contend with the post-crisis (new normal)? What will economic policy look like once the global financial crisis is finally over? Will it resume the pre-crisis consensus, or will it be forced to contend with a post-crisis (new normal)? Have we made progress in addressing these issues, or does confusion remain? In April of 2015, the International Monetary Fund gathered leading economists, both academics and policymakers, to address the shape of future macroeconomic policy. This book is the result, with prominent figures/including Ben Bernanke, John Taylor, and Paul Volcker/offering essays that address topics that range from the measurement of systemic risk to foreign exchange intervention. The chapters address whether we have entered a (new normal) of low growth, negative real rates, and deflationary pressures, with contributors taking opposing views; whether new financial regulation has stemmed systemic risk; the effectiveness of macro prudential tools; monetary policy, the choice of inflation targets, and the responsibilities of central banks; fiscal policy, stimulus, and debt stabilization; the volatility of capital flows; and the international monetary and financial system, including the role of international policy coordination. In light of these discussions, is there progress or confusion regarding the future of macroeconomic policy? In the final chapter, volume editor Olivier Blanchard answers: both. Many lessons have been learned, but, as the chapters of the book reveal, there is no clear agreement on several key issues. Contributors Viral V. Acharya, Anat R. Admati, Zeti Akhtar Aziz, Ben Bernanke, Olivier Blanchard, Marco Buti, Ricardo J. Caballero, Agustin Carstens, Jaime Caruana, J. Bradford DeLong, Martin Feldstein, Vitor Gaspar, John Geanakoplos, Philipp Hildebrand, Gill Marcus, Maurice Obstfeld, Luiz Awazu Pereira da Silva, Rafael Portillo, Raghuram Rajan, Kenneth Rogoff, Robert E. Rubin, Lawrence H. Summers, Hyun Song Shin, Lars E. O. Svensson, John B. Taylor, Paul Tucker, José Viñals, Paul A. Volcker

Prominent economists reconsider the fundamentals of economic policy for a post-crisis world. In 2011, the International Monetary Fund invited prominent economists and economic policymakers to consider the brave new world of the post-crisis global economy. The result is a book that captures the state of macroeconomic thinking at a transformational moment. The crisis and the weak recovery that has followed raise fundamental questions concerning macroeconomics and economic policy. These top economists discuss future directions for monetary policy, fiscal policy, financial regulation, capital-account management, growth strategies, the international monetary system, and the economic models that should underpin thinking about critical policy choices. Contributors Olivier Blanchard, Ricardo Caballero, Charles Collins, Arminio Fraga, Már Guðmundsson, Sri Mulyani Indrawati, Otmár Issing, Olivier Jeanne, Rakesh Mohan, Maurice Obstfeld, José Antonio Ocampo, Guillermo Ortiz, Y. V. Reddy, Dani Rodrik, David Romer, Paul Romer, Andrew Sheng, Hyun Song Shin, Parthasarathi Shome, Robert Solow, Michael Spence, Joseph Stiglitz, Adair Turner

Leading economists and policymakers consider what economic tools are most effective in reversing the rise in inequality. Economic inequality is the defining issue of our time. In the United States, the wealth share of the top 1% has risen from 25% in the late 1970s to around 40% today. The percentage of children earning more than their parents has fallen from 90% in the 1940s to around 50% today. In Combating Inequality, leading economists, many of them current or former policymakers, bring good news: we have the tools to reverse the rise in inequality. In their discussions, they consider which of these tools are the most effective at doing so.

Top economists consider how to conduct policy in a world where previous beliefs have been shattered by the recent financial and economic crises. Since 2008, economic policymakers and researchers have occupied a brave new economic world. Previous consensuses have been upended, former assumptions have been cast into doubt, and new approaches have yet to stand the test of time. Policymakers have been forced to improvise and researchers to rethink basic theory. George Akerlof, Nobel Laureate and one of this volume's editors, compares the crisis to a cat stuck in a tree, afraid to move. In April 2013, the International Monetary Fund brought together leading economists and economic policymakers to discuss the slowly emerging contours of the macroeconomic future. The book offers their combined insights. The editors and contributors/who include the Nobel Laureate and bestselling author Joseph Stiglitz, Federal Reserve Vice Chair Janet Yellen, and the former Governor of the Bank of Israel Stanley Fischer/consider the lessons learned from the crisis and its aftermath. They discuss, among other things, post-crisis questions about the traditional policy focus on inflation; macroprudential tools (which focus on the stability of the entire financial system rather than of individual firms) and their effectiveness; fiscal stimulus, public debt, and fiscal consolidation; and exchange rate arrangements.
