Not every fairytale has a happily ever after... For the first time in hundreds of years, the five kingdoms were at peace. United by the band of young heroes who'd won the Great War, the realm had entered a time of wealth and prosperity unlike anything it had known before. New families. New Beginnings. Old alliances were on the mend. But such a thing can never last. When Katerina and Dylan's teenage daughter finds herself at the center of a strange prediction, she and her friends are swept away on a wild adventure that may very well claim all of their lives. Old evils are lurking the shadows. A secret new darkness is waiting to take hold. Can the new band of heroes stop it in time? Or has their happily ever after finally come to an end? BOOK 2 - BRAVERY How long can you outrun your fate? When Evie and her friends set out to

fulfill a long-awaited prophecy, they never thought their adventure would turn into a nightmare before their very eyes. Trapped in a cavern beneath the ground, they find themselves going up against a creature so twisted and terrible, they wouldn't have believed it was real. Their strength is tested and friendships are strained. But as they soon discover, the creature was the least of their problems. The world is shifting. Shadows and darkness are entering the land. Rumors are whispering around the remaining kingdoms. Rumors of a dark and powerful stone. Can the friends find it in time? Or are some prophecies never meant to be? BOOK 3 - COURAGE How time flies... When Evie and her friends find themselves trapped in the sorcerer's cave, they think all is lost. But rescue comes from the most unlikely of people. And

with it comes the most terrible truth. With the five kingdoms divided and the realm on the verge of collapse, the prophecy is more urgent than ever. But the road is treacherous and the friends are on the other side of the realm. New alliances must be forged and friendships are tested as they set off to fulfill their destiny, only to find that the fates may have something different in store. Is it possible to pick up the pieces and start again? Can the friends get to the Dunes and find the missing stone in time? More importantly... ..are some sins too terrible to forgive? Be careful who you trust. Even the devil was once an angel. Gala, an exclusive event for rich shifters, a few weeks ago. She escaped the party with her four fated Alphas, hydra Zack, griffin Spence, cerberus Max and centaur Liam in tow. Only to go on the run from the paparazzi and Cyra's parents as news articles about them started to appear. When Cyra finally found some control back over her life, her parents sued Max for defamation because he dared to try to expose her parents' lies. With Max back in his hometown trying to defend himself and expose even more of Cyra's parents' lies, Zack at his side to make sure he makes it back alive, things fall apart even further. The morning that Max is supposed to show up in court, the apartment that Cyra, Spence and Liam are hiding in is attacked, forcing Cyra to transform into her phoenix shape for the first time in decades

as she desperately tries to protect Liam and they barely make it out alive. When a local centaur clan takes them in, the three find out that Max and Zack also tried to get to safety, only that it backfired and the two are now missing. Winter is approaching quickly, which makes safe travel in the mountains where the centaur clan lives complicated. Add to that that Cyra is pregnant with four babies, the whole world now seems to be searching for the near-legendary Omega phoenix for their own goals and Max and Zack could be anywhere right now. The five mates are doing everything they can to find each other and make it through the winter alive, but will it be enough? Quantum information processing is an exciting new emergent and interdisciplinary field. It combines questions of national security (When will today's public key cryptography be broken?) to questions of fundamental science (What are the fundamental limits to information processing?). It has thrived through the collaboration between the computer, engineering, mathematical and physical sciences. It is a field that is challenging our understanding of information, communication,

computation, and of the fundamental laws of nature. This book brings together leading research in the field.
