The essential study companion to DiPiro's Pharmacotherapy: A Pathophysiologic Approach, 10th Edition. Pharmacotherapy Casebook: A Patient-Focused Approach uses 157 patient cases to help you develop the skills necessary to identify and resolve the most common drug therapy problems encountered in daily clinical practice. The case chapters are organized into organ system sections that correspond to those of the companion textbook.

~~Instructor's Guide for
Pharmacotherapy Casebook: A
Focused Approach
Patient~~

The purpose of the Pharmacotherapy Casebook is to help students in the health professions and practicing clinicians develop and refine the skills required to identify and resolve drug therapy problems by using patient case studies. Case studies can actively involve students in the learning process; engender self-confidence; and promote the development of skills in independent self-study, problem analysis, decision-making, oral communication, and teamwork.
