Languages Design And

Implementation 4th ...

A programming
language

implementation is a
system for executing
computer programs.

There are two general
approaches to

programming language

Download Free Programming

languages:
interpretation and
compilation.

Interpretation is a
method of executing a
program. The program
is read as input by an
interpreter, which
performs the actions
written in the program.

Compilation is a
different process, where
a compiler reads in a
program, but instead of

Download Free Programming

running the program,
the compiler translates it
into some other
language,
