The operating modes of the Archon are the Automatic, Manual, and Flush modes. Automatic mode allows for complete unattended operation. Manual mode operation allows for single sample operation of the unit, priority sampling, and running blanks. The Flush mode performs the flushing with hot water and helium for the cleanup of the system.

Archon is a high performance modular
CCD controller developed by
Semiconductor Technology Associates,
Inc (STA). An Archon system receives
configuration information from and sends
status and image data to a host PC via a
gigabit Ethernet connection (either copper
or fiber).
