The KUKA.WorkVisual program code is already checked for logic in the background while programming steps are being carried out. This means that errors are nipped in the bud, and projects can be implemented more efficiently and consistently. Interactions are made visible by visual tools - making them more intuitive and easier to operate.

WorkVisual is the  
configuration tool for KUKA  
robots, it is not the  
simulation environment (that  
would be KUKA SimPro,  
KUKA|prc of course also  
simulates robots). So it  
will be important for you  
during setup, but probably  
not really something you  
will need on a daily basis.

## *Starting in WorkVisual*

En KUKA.WorkVisual se pueden predeterminar directamente la configuración E/S, la conmutación, las cinemáticas ajenas, los Robotteams y Save-Robot 3.0 en función del control de robot, el control PLC, el Motion Control y el Safety Control. Así ya se pueden añadir y eliminar posibles conflictos de forma offline. Este sistema reduce el tiempo de puesta en servicio sin aumentar los riesgos ...
